# Test Observations/Improvements

1. User cannot select quantity while ordering any product. For example, if I have to order 2 coke then I need to add it and again I have to select the same product to add it again. Quantity should be given while ordering any product.

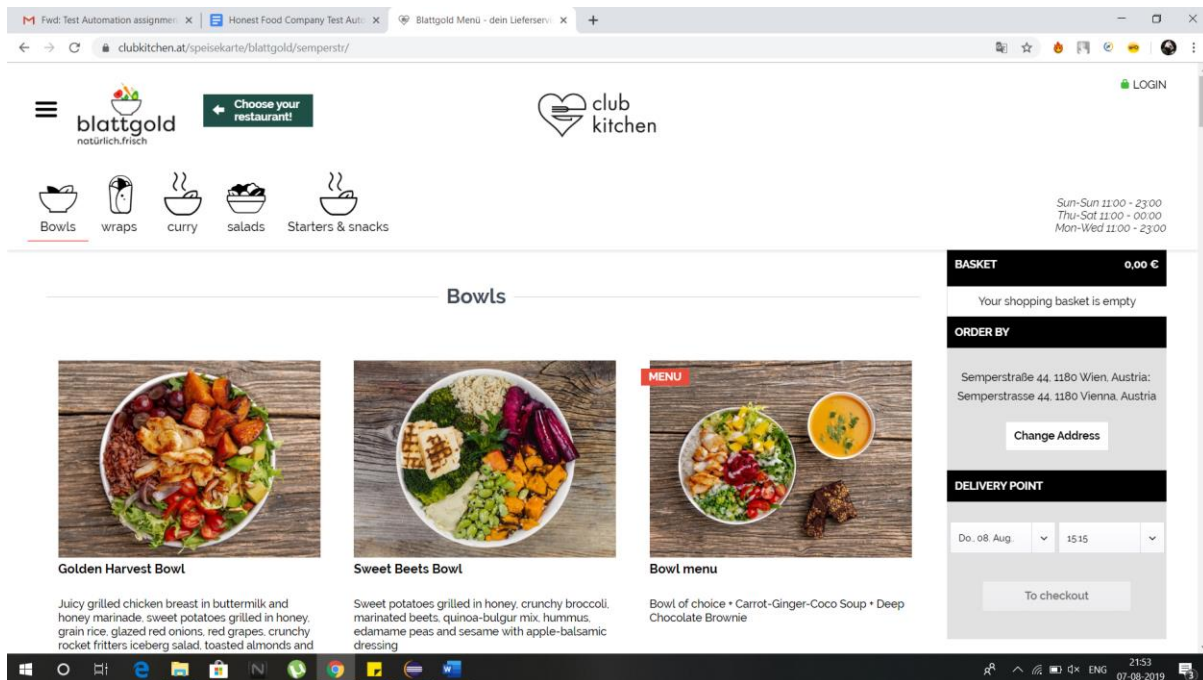

2. User cannot increase or decrease the quantity in the basket. If a user wants to change the quantity then he has to remove it from the basket and add it again.

3. There should be decimal instead of comma in the product prices.

4. Multiple addresses are shown in the bucket.

5. Only Sunday should be given in the timings instead to 'sun-sun'.

Sun-Sun 11:00 - 23:00
Thu-Sat 11:00 - 00:00
Mon-Wed 11:00 - 23:00
